

GeoMatrix II being applied from tower

GeoMatrix™ II - Stabilized Fiber Mulch

Our Premium Wood Mulch + Organic Bonding Agents sprays on like a mulch, but dries to form a porous, breathable, mat that bonds firmly with the soil, prevents erosion, and saves time and money.

GeoMatrix™ II combines the low cost and ease of hydroseeding along with moderate protection against soil erosion. GeoMatrix™ II consists of premium softwood fibers, specially formulated tackifiers, and proprietary ingredients that provide benefits such as viscosity control, reduced foaming, improved water retention and increased wettability of fiber.

Our mat protects seeds and enhances germination then decomposes over time into carbon dioxide and organic matter to further

aid in plant development. GeoMatrix™ II is recommended for areas where stabilization is required for 1 to 2 months and where an economical method is required for providing moderate protection of soil surfaces before vegetation is established.

When applied, the wood fibers and customized additives in GeoMatrix™ II form an interlocking matrix that conforms with the soil, locking the two together. Once dry, the customized mat is breathable, strong, porous, and extremely erosion resistant, providing protection for up to 2 months!!!

GeoMatrix™ II

STABILIZED FIBER MULCH

Scientifically formulated to achieve maximum soil stabilization

Grass Growing Through Fiber

Application of GeoMatrix™ II
Full Germination of Grass

GeoMatrix™ II Advantages

- Stabilizes moderate slopes
- Retains moisture for turf establishment
- Prevents seed migration
- Extra lubricity, prevents clogging
- 100% Biodegradable

GeoMatrix™ II Properties

Package Weight	50 lbs.
Water Holding Capacity	15 times its weight in water
Mineral Activators	5% Total Weight
Application Rate	1200-3500 lb per acre based upon soil composition and slope gradient

Our product provides the ULTIMATE PROTECTION against erosion while supporting the establishment of healthy vegetation- both at an affordable cost. You be the judge! Contact us today for a FREE, no obligation analysis of your site's soil, and a cured sample of the GeoMatrix™ II fiber matrix.
